

# Distant Intention Experiment

March 17 2017 Lynne McTaggart during her workshop in Miami organized collective meditation with focused intention to the laboratory of Dr. Korotkov in St. Petersburg.

In St. Petersburg Sputnik sensor was turned on in off-line mode 90 min before the agreed time of experiment and was running 70 min after this time. Experimental room was empty, all other equipment was turned off. Fig 1 demonstrate processing of the results.

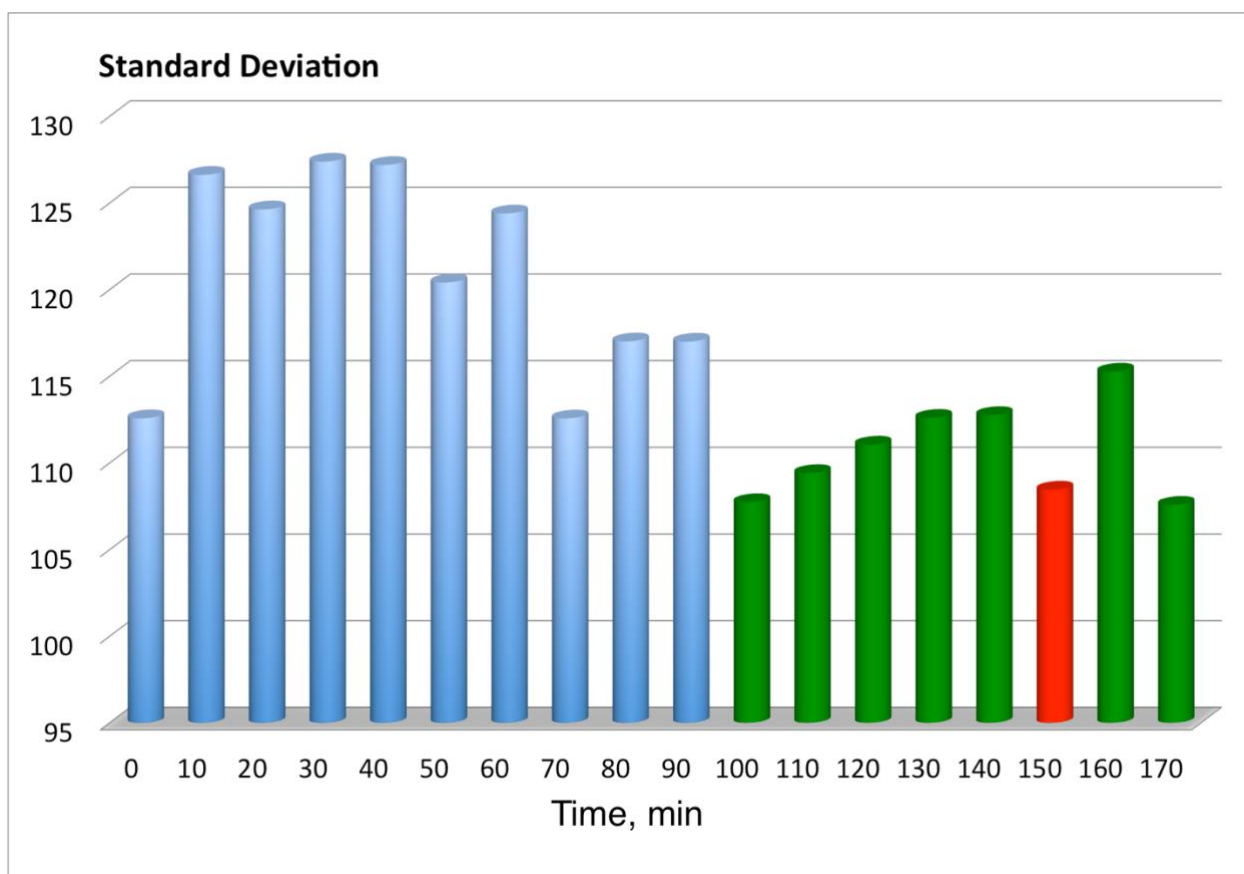

Fig.1. Dynamic variations of the Sputnik signal during Distant Intention experiment. Every bar is averaged data in 10 min. Blue lines – control time, green – agreed time of Intention, red bar – Dr. Korotkov entered the room.
